

Technical Data Sheet

Installation of the Harvest 8401, Harvest MOD 8402, and Harvest MOD A 8402 Rear Cover Gasket *Assembly 94-58402*

KIT CONTENTS:

4'-3/8" High Density Rope Gasket
1- Gasket Glue

TOOLS REQUIRED:

7/16" Wrench or Adjustable Wrench
Putty Knife

BEFORE YOU BEGIN:

Make sure all fire in the stove is out and the stove is cold.

PROCEDURE:

1. Remove the rear heat shield.
2. Remove the rear cover by removing the nuts, which secure the cover to the cast iron chamber back.

Note: Inspect the combustors, clean the surface of the combustors and the throat area below the combustors if necessary.

3. Using a putty knife, scrape the existing gasket from the inner surface of the rear cover. If any gasket has stuck to the cast iron chamber back, remove this as well.
4. Turn the top of the gasket glue to open it. Apply the gasket glue to the edge of the rear cover.
5. Immediately replace the cover and snug bolts to produce a snug seal.
